

# TUNAPA IT SOLUTIONS

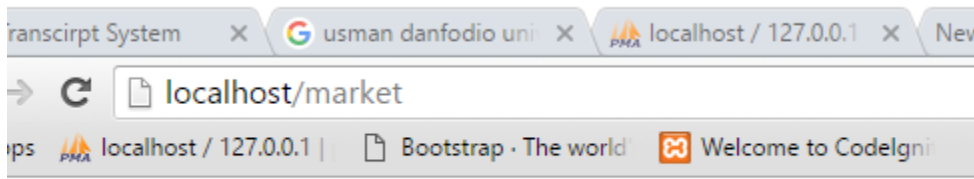

## HOW TO INSTALL

1. Unzip the zipped file market.zip after downloading.
2. When you open it you will find a folder market, copy the files inside into your xampp directory , locate htdocs and create a folder there and name it market. **NOTE MAKE SURE THE FOLDER IS NAMED MARKET.**

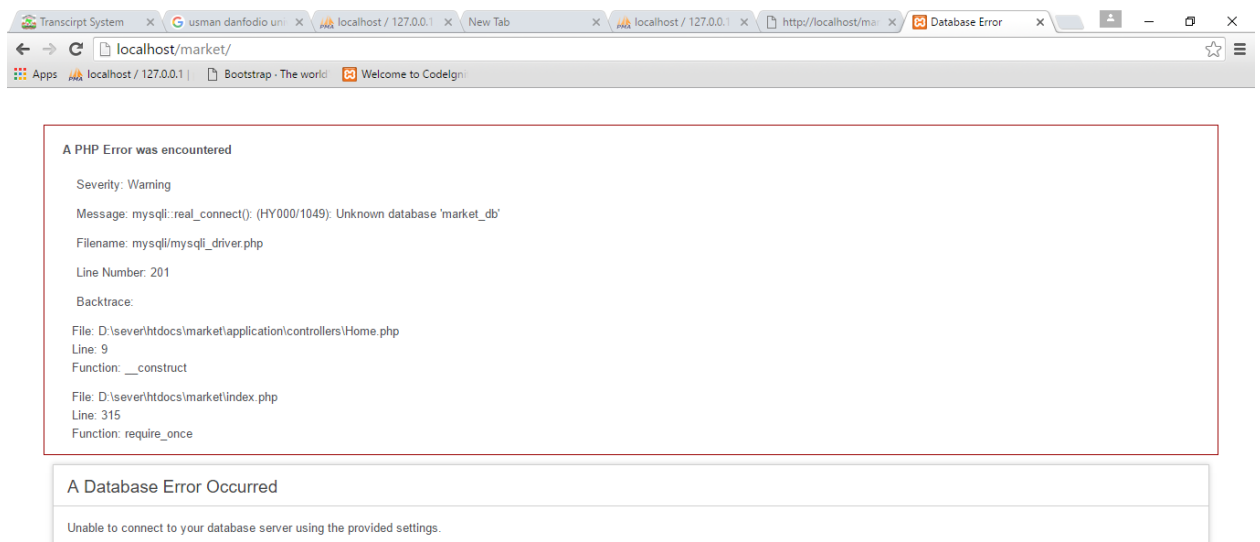

3. Then paste the copied files inside the market folder .

4. AFTER that go to your browser and enter this url below

5. You will see this error below it means you need to create the database

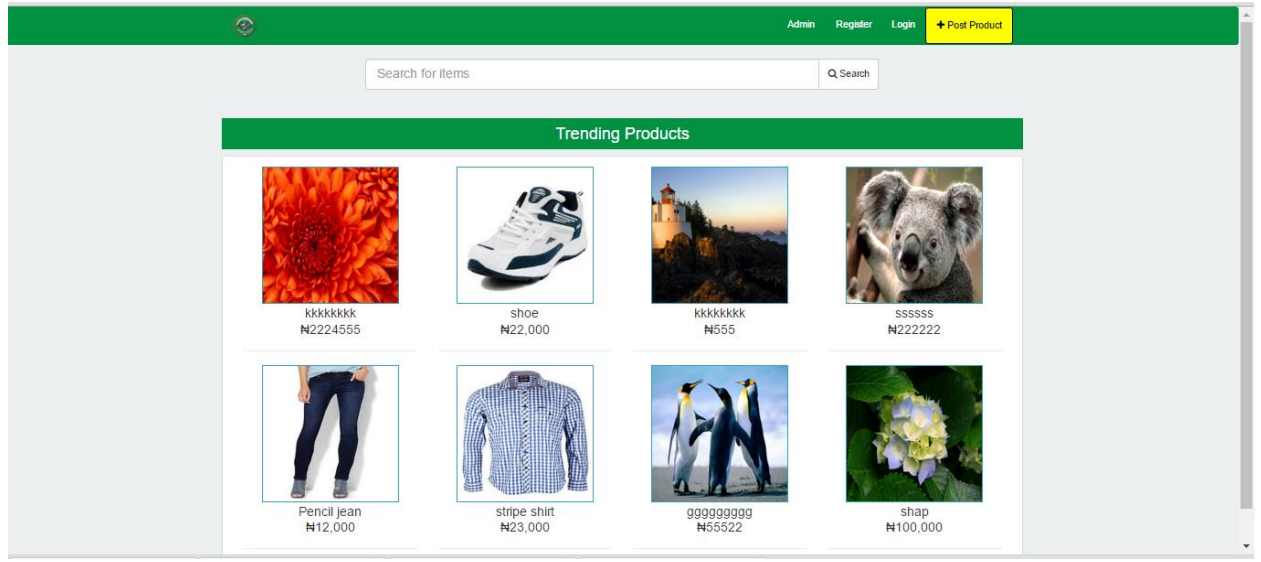

6. Now enter this url “localhost/phpmyadmin” in your browser . and create a

database called **market\_db**

7. Then you will import a sql file in the sql folder into the **market\_db** you created

8. After importing, go back and refresh the “localhost/market” and you will get

the below screen. that’s all just register a user and use

## **REQUIRMENTS**

- Use XAMPP , Don't use wamp
- Chrome browser for effective browsing
